Fighting for and ultimately winning the right to vote was the foundation for all subsequent advances for women's legal and economic equality in the United States. With the right to vote, women could leverage their political power to win rights and push forward change and social justice. The story of the vote cannot be told without the story of Tennessee. And with the museum, more people – of all ages from across Tennessee and the nation – will now know the critical role Tennessee played. As we explain in our FEMINIST 250 series at Msmagazine.com, examining the past "makes it possible to better understand our present and to plan more inclusive visions for our collective future".

The Tennessee story must never be lost for this generation and for future generations. Congratulations to the Suffrage Coalition for its vision and this extraordinary undertaking.

Sincerely,

Katherine Spillar, Executive Director
Feminist Majority & Feminist Majority Foundation
Executive Editor, Ms. magazine
